Exploring Linters to Support Testing in Python: Question 1

- What happens when the code is run?

```
codio@virussenior-prefixheroic:~/workspace$ python3 styleLint.py
File "styleLint.py", line 5
    """ Return factorial of n """
                                ^
IndentationError: expected an indented block
codio@virussenior-prefixheroic:~/workspace$
```

- Can you modify this code for a more favourable outcome?

```

6      if n == 0:

Exploring Linters to Support Testing in Python: Question 5 (e-Portfolio Entry)

From Section 5 of the Firdaus et al (2014) reading, select a test technique from the following categories:

- Specification-based techniques
- Structure-based techniques
- Experience-based techniques

Discuss the scenario(s) in which each technique would be important to be use
